

Star Sticks

Polystyrene star
Glitter
Glue
Skewers
Paint brush
Jar
Sticker (optional)

1. Pierce the skewer in between the stars points. Make sure the skewer is firmly in the star.
2. Holding the skewer glue both sides of the star.
3. Sprinkle glitter over both sides of the star.
4. Stand in jar to dry.
5. Once dry decorate with stickers or leave it plain.

Tips:

Use polystyrene balls instead of stars.
Paint the star first with a different colour from the glitter you will be using.
This gives the star a 2 tone effect.
